

JAMIE GODWIN

PRODUCT VENTURE LEAD

jamieg177@gmail.com
Johannesburg, South Africa
Portfolio: [\[Portfolio\]](#)

I work at the intersection of product, venture, and design. My role is to help teams turn uncertainty into direction by shaping opportunities, validating ideas, and aligning customer needs with business goals. With a background in design leadership, I bring a user-centered perspective to product strategy, venture development, and innovation, focusing on outcomes rather than outputs.

PROFESSIONAL EXPERIENCE

Product Venture Lead

Neslo | Apr 2024 — Present

- Lead product discovery and venture validation initiatives across client and internal products
- Define product strategy, positioning, and roadmap priorities with stakeholders
- Facilitate workshops to identify opportunities, validate assumptions, and reduce delivery risk
- Align customer needs, business objectives, and technical constraints into actionable product direction
- Guide multidisciplinary teams across design, development, and delivery
- Integrate AI-enabled workflows and emerging technologies into product processes
- Establish frameworks for experimentation, validation, and continuous product improvement
- Support go-to-market thinking through product positioning, user experience, and value proposition development

UI/UX Designer (Contract)

First National Bank (FNB) | Jun 2026 — Present

- Design intuitive user experiences for enterprise banking products
- Translate complex business requirements into scalable digital solutions
- Collaborate with product, business, and development teams across agile environments
- Create and maintain design systems, user flows, wireframes, and prototypes
- Leverage AI tools to accelerate research, ideation, documentation, and design workflows
- Drive continuous improvement through user feedback, testing, and iteration

UI/UX Designer (Contract — EY Catalyst)

EY Catalyst | Oct 2022 — Dec 2025

- Translate complex enterprise requirements into intuitive, scalable interfaces
- Work in agile cycles, adapting quickly to feedback and evolving priorities
- Create wireframes, high-fidelity designs, and prototypes in Figma
- Collaborate asynchronously with global teams using Figma, FigJam and DevOps
- Align design work with business goals to support product functionality and growth
- Improve user experiences through audits, user flows, and iterative updates
- Create, maintained and documented design systems to ensure consistency across tools

Digital Designer

Neslo | Oct 2021 — Mar 2024

- Balanced multiple brand, web, and product design projects at once
- Created scalable UI systems and responsive layouts with accessibility in mind
- Delivered mobile app interfaces and component systems for client products, applying native UI patterns and ensuring accessibility across devices.
- Designed and prototyped in Figma for both client and internal brands
- Collaborated with cross-functional teams to turn ideas into usable interfaces
- Supported Webflow development with build-ready specs and clean handoffs
- Delivered branded digital assets for web, social, and campaigns
- Participated in design reviews, user testing, and iteration cycles
- Contributed to a collaborative team culture and mentored junior designers

Social Media Manager

Reach Engage Develop | 2020 — 2021

- Built content strategies for small brands and startups
- Designed and scheduled social media campaigns
- Analyzed engagement metrics to improve reach and conversions
